

February 2006

Multi-Window Feature, Multiple Search Engine, Picture in Product Master, Inventory Payment Application, Financial Reports in Excel, Royalty Scheme for Education System, Selectable Auto Running Number, Print After Save, History Page, More Ease of Use

Multi-Window Feature- Users can open up to five different pages when using Xeersoft.- Default pages could be set for each window through the favourite page.

Multiple Search Engine - Our search engine has now been upgraded to produce better and more accurate result- This search engine allows customizable search feature

Picture in Product Master- We can store the pictures of the product in the master entry

Inventory Payment Application- Xeersoft now supports Payment Approval Flow from Purchasing department to Finance department

Financial Reports In Excel- Our reports have the option to export to excel

Royalty Scheme for Education System- Xeersoft has created a dynamic royalty system for our Education System.

Selectable Auto Running Number- Xeersoft accounting enable users to use multiple running number for each document type. - Users could define their own auto running number schemes and formats. Print After Save- This option allow users to immediately print the document they have just keyed in.

History Page- Users could now return to their last used pages through the history page

More Ease of Use- Copy User Role

- Copy Favourites

- Improved Jump Code - Users can now jump to their favourites by keying in their defined favourite code in the jump textbox

And much more!
