### Xeersoft Presents- MultiCurrency

At Xeersoft, we grow as our customer grow. To support our customer's growth to global markets, Xeersoft has now incorporated multicurrency capability in our systems.

Companies could now run their business in multiple currencies, consolidating their data to a master currency. Automated currency calculation would ensure accuracy in value and currency gain and loss. Xeersoft also provides multiple currency views for reports which allow users to view any existing reports to any available currencies.

1) Accounting - Debtor and Creditor with own currency. - Entries and Listing in currency. - Automated Gain and Loss Calculation. - Reports with Mutliple Currency views.  
Setup Entry Report

2) Inventory - Debtor and Creditor with own currency. - Entries and Listing in currency. - Posting keep to Document Currency - Reports with Mutliple Currency views. Setup Listing Page Sample Report
