Xeersoft Presents- Merchandising Stage1

Drawing from vast industrial background in retail services, Xeersoft aims to provide comprehensive merchandising capability for all customers. Emerging from a transactional based inventory system, the merchandising system will integrate Information Technology with Retail Concept to drive profitability and provide agility in conducting strategic business move.

Advance Sales and Purchase Analysis - Unlimited Levels of Grouping would allow users study every aspect of sales and purchase data - Crosstab Results with your main grouping. - With this capability in your hands, you can create reports like:

- Daily sales
- Salesman's individual product sales by area
- Monthly Purchase of each division by store

Report Query Sample Report 1 Sample Report 2 in Excel

1) Groupware Calendar - Xeersoft has integrated a scheduling calendar into our system to provide company-wide groupware capability for our customers. - Add and schedule events and tasks - Coordinate scheduling among peers - Assign job and task to subordinates MiniCalendar Scheduling Entry 2) Consolidated Batch Control - Users can now consolidate their batch auto running number from different documents - This enable different documents with similar business nature to use same number
